

A decorative graphic on the left side of the slide consisting of two overlapping parallelograms. The front one is blue and the back one is a light green color. They are positioned diagonally, with the blue one partially covering the green one.

Superfunds: Visualizing the Most Polluted Areas in the US

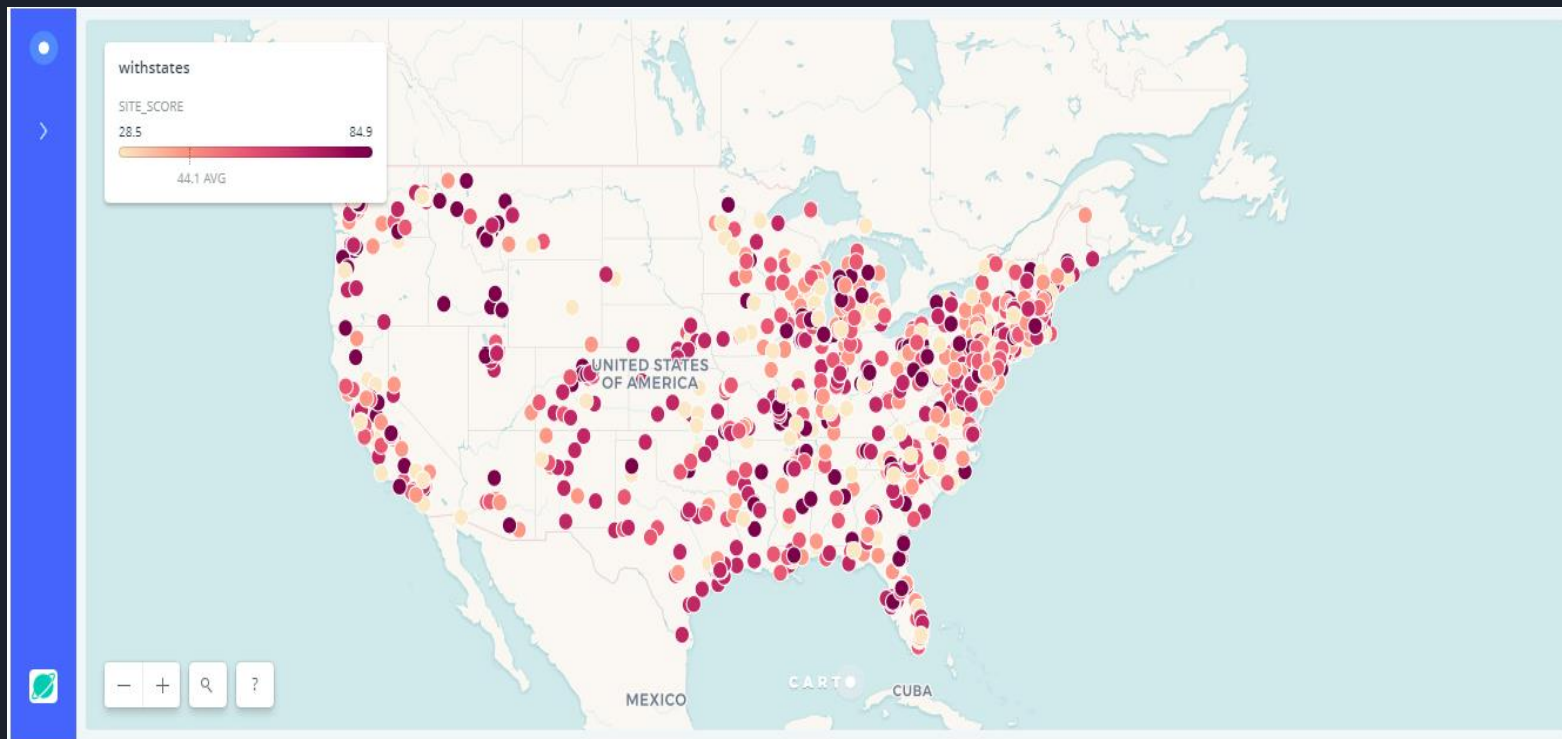

Stanley Lai | Milaud Nik-Ahd

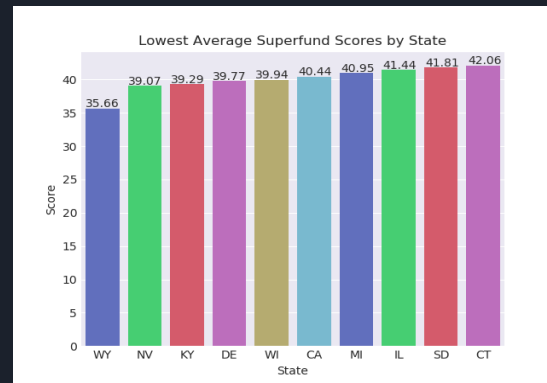

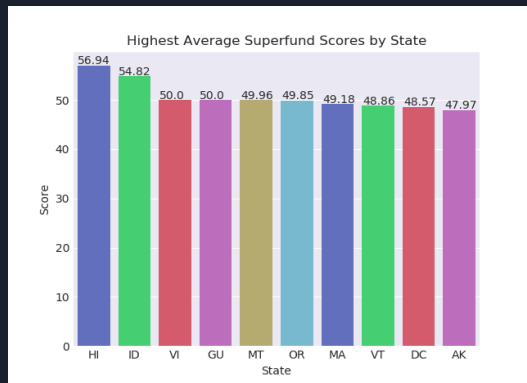

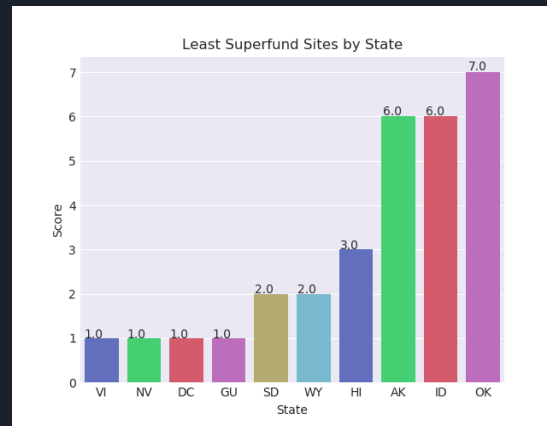

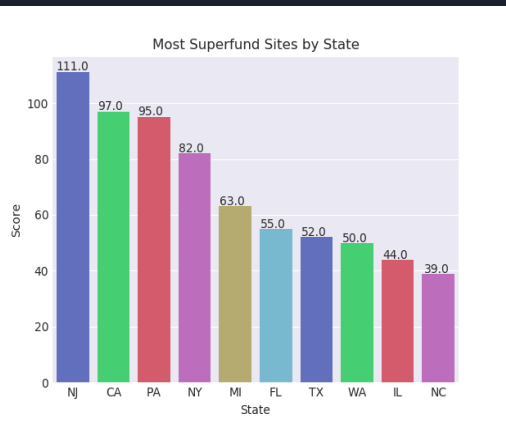

Terms and Motivations

- Superfund site – Heavily polluted areas that the EPA designates as health hazards.
- Hazard Ranking System – Scoring system that ranks waste sites according to their risks to public health and the environment. 28.5 = NPL.
- Are we doing enough to clean up these sites?
- How can we avoid creating new sites?

Where are Superfund sites located?

The Breakdown

Contamination
